OBJECTIVE

I studied Python Full Stack web programming at "Bobir Akilkhanov" Tech Academy.

I am a software engineer with more than 2 year experience in web development. During this 2 year I was mainly involved in API release. I am looking for a company where I can contribute to big projects

WORK EXPERIENCE

"Universoft" LLC, Tashkent

December 2021 – Present Software Engineer
Being a back-end developer, I released an API for the frontend.

Projects:
- Taxi - passenger transport ordering application: I coded the API part using Django, Rest Framework and the main data exchange and communication part using WebSocket technology. In this project, I used PostgreSQL (PostGIS) database to store data.
- I created the management system of parsers, optimized them and integrated them into the backend. I used Django Rest Framework to build API, Selenium library for Parser code, Celery technology for control system and optimization.

"TECHNOPARK AL-JABR" LLC, Uzbekistan

November 2020 – December 2021 Software Engineer
I'm mainly a software engineer in Python programming language, mainly released API for company projects and wrote telegram bot, online shop and visit site for part of several projects and as a separate project.

Projects:
- Telegram Bot for watching visits. Using python for bot and C for Raspberry Pi for send informations to database.
- editory.uz website, this site for changing documents, totally Django project for frontend used html, css, bootstrap, jquery. I learn payment system in this project.
- websites for several internal company projects.

"Freelance"

Free times I do freelance with my friends. I lot of expriences i get on that

Projects:

- https://doctor-ali.uz website and mobile app. This is online shopping and online consultation system. I use Firebase Cloud Messaging and Celery for Notification. Websocket for chat and face time. Subscribe Api for payment system and etc.
- and many other kind of websites and bots

EDUCATION

Full Stack Web Development

1 Year Bobir Akilkhanov Tech Academy

I scored 98 out of 100--

SKILLS

--

• **Technical skills**:
   o Python (Core, OOP)
